DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-7, 9-12, and 15-17 rejected under 35 U.S.C. 102(b) as being anticipated by Wigmore. The gasket is readable on the adhesive and elements 19 and 45. Note the pressure generator is readable on the piston 25. The plurality of cavities are readable on the plurality of chambers and passageways. The venting is achieved by the exhaust ports and the vent passage 49.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4, 8 and 18-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In these dependent claims the correlation of the airway to a patient, the pressure pick-

off and the gas flow sensor should be more definitive in the claims. How does these elements correlate with the pressure support system.

Clarification of the above noted observation is requested.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George I. Walton whose telephone number is (703) 308-2596.
